

## The Westan Difference

More than a supplier, Westan will work with you to bring to life a complete range of AV solutions. As your distribution partner Westan can:

- Provide you with state of the art technology solutions
- Specialised mounting solutions
- Manage dropshipping and kitting of solutions over the life of a project
- Provide onsite warranty
- Provide tech support to help you design the right solution for your project

This the Westan difference – we'll turn your AV concept into reality.

## Westan, Philips & You: A Winning Signage Partnership

Westan is the largest distributor of Philips commercial displays in the APAC region. From advanced airport installations to interactive classroom solutions, Philips has a broad range of 'best in class' panels, renowned for their stunning image quality and reliability.

Apart from exceptional performance, Philips' latest generation Signage Solutions focus on convenience for integrators offering an open Android environment for integration of signage applications or any other solution you may choose.

## A Westan Digital Signage Case Study

**Audi Centre Melbourne**

Systems Integrator, Urban Intelligence, utilised Philips zero bezel videowall displays for multiple feature walls in Zagame's showpiece Audi showroom in Melbourne. The panels needed to run 24/7 and meet stringent performance requirements. The videowall displays premium hi-def Audi-authored content and provides

an eye-catching attraction, visible from the showroom entrance, that draws clients through the centre. Westan assisted with both onsite technical support and videowall colour calibration to ensure a successful project deployment.

# A Signage Experience Beyond the Ordinary

Philips offers professional display solutions that help you make the right impression across all applicable signage categories.

Our broad range of professional displays provides options for any project, whether the key requirement is cost effectiveness or performance.

**Affordable Retail Signage with Q Line**  
 16/7 | Slim Full HD | Onboard Media Player  
 A complete range of sizes with reliable cost-effective performance but still comprehensive signage features.

**Stunning Menu Boards with E Line or V Line**  
 24/7 | Slim Full HD | 6.5mm Bezel | 500 or 700 Nits  
 The good-looking workhorse of the range that's built for performance but packed full of every functionality you could want.

**Video Walls with X Line**  
 24/7 | 3.5mm I2I | 500 or 700 Nits  
 Create new stopping power with Ultra Narrow Bezel displays. Make the most of your display with Philips Colour Calibration.

**Interactive Spaces with T Line**  
 24/7 | Up to 10 Touch | 42" to 84"  
 Discover a new level of interaction with true Multi-Touch displays with multiple OS operability.

**Android OS with D Line**  
 24/7 | Customisable API | 450 Nits  
 Open Android environment for developers wishing to integrate software onboard. Wi-Fi and scalable storage.

**Very High Brightness with VH Line**  
 24/7 | Slim Full HD | 2000 Nits  
 Overcome the brightest of ambient light conditions with our 2000 Nit 47" with more to come.

**Amazing UHD images with U Line**  
 24/7 | 4K Resolution | 500 Nits | Multiview  
 Ultimate large screen experience available in 75", 84" & 98" with Multiview for viewing multiple sources simultaneously.

## A better way to work. Together.

With a Westan boardroom display and collaboration solution, every meeting can be productive, every encounter collaborative, and every presentation impactful.

## InFocus Mondopad

### Collaborate in 4K

Westan can provide a complete collaborative meeting solution using state-of-the-art capacitive touchscreens, video phones, mobile devices or any browser-based hardware.

All these solutions are brought together via an InFocus ConX cloud-based conferencing and collaboration service.

With the Mondopad you can present, annotate and collaborate on (up to) an 85" 4K multi-touch screen with meeting participants in the room and around the world. Everything you need to visually present, capture and share ideas is at your fingertips.

The Mondopad Windows environment allows any third party software to be installed and utilised in this collaborative environment.

## Jtouch DigiEasel with Wireless Collaboration

Display your content via Miracast, Airplay or Litecast, allowing content from any device to be simply shared onto the screen.

Make notes via the whiteboard and share those notes via email or network printer. Access shared resources or browse the web via onboard browser.

Make interactive HTML5 signage content using InFocus Signage authoring tools.

Connect external PC's or Players via multiple HDMI and USB interfaces.

## MVP100 Video Phone

The InFocus ConX Phone is the only phone you'll need on your desk. This HD video phone enables effective visual communication with the ease of a standard phone so you can be more productive in your business interactions.

The InFocus 121 video calling service is free for the first year, so you're ready to make calls right when you plug it in.

## Boardroom Accessories

### InFocus Thunder Speakerphone

Speakerphone for Efficient Collaboration in Large Conference Rooms.

### Aidoru Trolleys

Multiple Screen Video Conferencing Trolleys with Comprehensive Accessories.

### Realcam PTZ Camera

PTZ Camera with HD Clarity, Connectivity and Control.

## Dragonfly Projection Screens

State-of-the-art thin frame projection screens with UHD woven fabric and ambient light rejecting options with a unique time saving installation system.

## Epson Projection

Exclusive Epson Home Theatre projector EHTW9300 with Lens Shift and Lens Memory for amazingly affordable true cinematic experience.

## Episode Home Theatre Speakers

Cutting-edge hidden home theatre speakers and subwoofers including Atmos compatible in-ceiling and in-wall surrounds. Truly high end performance without the price tag.

## Strong Racks

Equipment racks make installs cleaner, more serviceable and even more reliable. That's why we believe every job deserves one. Strong combines robust build quality with a variety of innovative designs to suit any project.

## Philips Hospitality Solutions

### For every application

For the last 40 years Philips has been leading the Hospitality TV industry. Its innovative TV solutions are found in numerous global hotel chains, sports stadiums, cruise liners, detention centres and healthcare facilities.

Philips continues to innovate, releasing the world's first hospitality range with Android onboard. Philips continues to lead the industry with new unmatched luxury viewing solutions for the ultimate in-room experience.

## AmbiLux: Truly the Ultimate Hospitality Display

AmbiLux represents a quantum leap forward for the existing Philips Ambilight system. The new AmbiLux technology takes this concept even further, with actual on-screen images now also displayed and extended up to three metres behind the set by using nine pico-projectors, each precisely positioned on the rear of the AmbiLux TV.

Not only is the visual experience on the wall breathtaking but also on the screen and as this is a Professional TV we have complete control, integration and IPTV capabilities built in.

## Hotel TV: Signature

Signature is simply the best hotel TV money can buy for the ultimate luxury hotel application. Available up to 65".

## Sporting Stadiums: Mediasuite

Integrated IPTV solutions for large public venues with Mediasuite removing the need for separate IP endpoints.

## Healthcare

Unique hospital TV solutions including white medical-grade screens as well as IPTV and Nurse Call Integration.

## Professional Android IPTV Solutions

New Android onboard range for enhanced IPTV solutions and VOD or CMS integration.

westan

Westan distributes a wide range of audio-visual products to cater for residential, education, corporate and digital signage requirements. Our aim is to have a visual solution to suit any project requirement. This includes everything from single screen domestic installations to multiple screen signage applications complete with content management, state-of-the-art video conferencing solutions or the most demanding of video projection requirements. Along with visual solutions we offer residential and commercial audio products to complement any video project. Westan also provides all the hardware and interconnecting technologies you need to complete your project, from networking solutions to IP surveillance, in cabinet racks, mounts, cables, video distribution and much more. Westan has the complete solution to deliver your entire project requirement.
